

Robert C. Welliver, Sr, MD, is the Hobbs-Recknagel Endowed Chair in Pediatrics, Professor of Pediatrics and Chief of Pediatric Infectious Diseases at the Children's Hospital at Oklahoma University Health Sciences Center (OUHSC). Dr Welliver received his medical degree from the University of Florida College of Medicine in Gainesville, FL, and completed residency training in Pediatrics as well as a fellowship in Pediatric Infectious Diseases at UCLA Center for the Health Sciences in Los Angeles.

A Fellow of the American Academy of Pediatrics and the Infectious Diseases Society of America, Dr Welliver is a member of the American Pediatric Society, Society for Pediatric Research, American Association of Immunologists, the American Society for Microbiology, and the American Thoracic Society. He has received the Louis A. and Ruth Siegal Award for Excellence in Teaching from the State University of New York at Buffalo School of Medicine and Biomedical Sciences, the Frederick B. Wilkes Award for Teaching from the Pediatric Residents at Women and Children's Hospital of Buffalo, as well as twice receiving the Outstanding Faculty Teaching Award in Pediatrics at OUHSC. The pediatric residents at OUHSC named him the faculty member who best represented humanism in medicine. Dr Welliver has been listed in *The Best Doctors in America* since 1998.

His career interest is in respiratory syncytial virus (RSV) and influenza virus infections. Dr Welliver has authored more than 230 articles (147 peer-reviewed) in such journals as *New England Journal of Medicine*, *Journal of Infectious Diseases*, *Journal of Pediatrics*, and *Journal of Immunology*. He has received funding for research from the NIH, Oklahoma Center for Science and Technology, and various pharmaceutical companies including Merck, MedImmune and Novavax. His current research efforts are in developing an RSV vaccine for use in human infants and adults.
